Lepidoptera of Iran based upon the Info-system of the Cesa

Ahmet Ömer Koçak Muhabbet Kemal

Abstract: *Lepidoptera* of Iran based upon the Info-system of the Cesa. *Priamus* (Suppl.) 31: 1-487. This study is a part of the Cesa project entitled “*Lepidoptera Asia*”. Previous related publications of the project are briefly explained. Outlines of working programs and studying conditions are discussed. Faunistically, 3925 species of 1449 genera in 57 families are listed synonymously for the first time. Among them, 420 species belong to the butterfly families, and 3505 species to the moths. Rich distributional information for each taxa in Iran and also in abroad are mentioned as codes. Original references are also added to some taxa. As a separate informative and complementary list of the 1240 subspecies known in Iran is also given. For 57 families brief, and full annotated bibliographically as 1534 items are evaluated and mentioned. Selected provincial lists of the species are added. Together with their species numbers recorded, these provinces are as follows; Eastern Azerbaijan Province (234), Western Azerbaijan Province (468), Fars Province (1164), Kerman Province (244), Khorasan Province (554), Kurdistan Province (255), Mazandaran Province (645), Sistan-Beluchistan Province (596), Tehran Province (925), and Zanjan Province (136).

Key words: *Lepidoptera*, butterflies (*Papilionidae*, *Pieridae*, *Argynnidae*, *Libytheidae*, *Danaidae*, *Satyridae*, *Lycaenidae*, *Hesperiidae*), moths (*Agonoxenidae*, *Alucitidae*, *Arctiidae*, *Autostichidae*, *Blastobasidae*, *Brachodidae*, *Brahmaeidae*, *Bucculatricidae*, *Carposinidae*, *Choreutidae*, *Cimeliidae*, *Coleophoridae*, *Cosmopterigidae*, *Cossidae*, *Ctenuchidae*, *Douglasiidae*, *Drepanidae*, *Elachistidae*, *Epermeniidae*, *Ethmiidae*, *Gelechiidae*, *Geometridae*, *Glyphipterygidae*, *Gracillariidae*, *Lasiocampidae*, *Lecithoceridae*, *Lemoniidae*, *Limacodidae*, *Lymantriidae*, *Lyonetidae*, *Momphidae*, *Nepticulidae*, *Noctuidae*, *Notodontidae*, *Oecophoridae*, *Psychidae*, *Pterophoridae*, *Pyrilidae*, *Saturniidae*, *Scythridae*, *Sesiidae*, *Sphingidae*, *Stathmopodidae*, *Thaumetopoeidae*, *Thyatiridae*, *Tineidae*, *Tortricidae*, *Yponomeutidae*, *Zygaenidae*), Iran, Eastern Azerbaijan, Western Azerbaijan, Fars, Kerman, Khorasan, Kurdistan, Mazandaran, Sistan-Beluchistan, Tehran, Zanjan, fauna, catalog, bibliography.

Introduction

Within the Cesa Project entitled “*Lepidoptera Asia*” [LAS]¹, following preliminary faunal lists of various states of Asia have been published by the authors. As the first results of the Cesa Project on the World Lepidoptera, the authors published their first preliminary lists of the following states or regions: Transvaal (South Africa) (2125 spp.), Uighur A.R. (1271 spp.), Iraq (1184 spp.), Doi Inthanon (North Thailand) (438 spp.), Chiang Dao (North Thailand) (618 spp.), Chiang Mai (North Thailand) (328 spp.), Afghanistan (1599 spp.), Iran (3295 spp.), Philippines (2337 spp.).² Later, revised and expanded lists on the Old World faunas have been published. Among them, the following asiatic countries are noteworthy. Turkey (Koçak & Kemal, 2007, 2008, 2008, 2009), Afghanistan (Koçak & Kemal, 2007, 2012), Russia (Koçak & Kemal, 2008), Indo-China (Koçak & Kemal, 2009), Thailand (Koçak & Kemal, 2010), Sri Lanka (Koçak & Kemal, 2012), Pakistan (Koçak & Kemal, 2012, 2014).

As to the *Lepidoptera* of Iran, the first attempt of the authors has been published in 2007 as a simple list of the 3295 lepidopteran species (Koçak & Kemal, 2007). In 2012, the authors published the results of entomofauna of Turkey together with the faunal lists of the neighbour countries. For example, 7475 pterygot species are listed for Iran.³ Totally 1056 lepidopteran species of Fars Province (S. Iran) are given by the authors.⁴ Western Azerbaidjan (NW Iran), totally 432 lepidopteran species of the 29 families are mentioned synonymously (Kemal & Koçak, 2013).

A faunistical site entitled “List of the moths of Iran” in the Wikipedia⁵ has been just visited. There, about 2000 moth species are reported in Iran.

Database program used in the info-system of the Cesa is completely an original idea of the authors. Information inserted are always under maintenance by the first author; updated from time to time. The present list of the Iranian Lepidoptera is thus based upon our data-base information. Briefly, this study is mainly composed of the following chapters; (1) List of the genus group names known in Iran, (2) List of the species known in Iran, (3) List of the subspecies known in Iran. Full bibliography of the Lepidoptera of Iran is given as author index at the end of this study (4). On the other hand, brief bibliographical information are given in the specific list (Part 2), under the related families.

In the first part of this study, totally 1449 genus group taxa have been determined as valid among the Iranian Lepidoptera. The generic list is arranged alphabetically with their full synonyms. Original references are also mentioned for some taxa.

In the second part, list of the 3925 species known in Iran are given in alphabetical order under their families. Synonyms, original references and the range of the species (in codes) and brief bibliographical information are mentioned for the families.⁶ Total number of the lepidopteran families is 57. These families are as follows alphabetically under the two groups, i.e., butterflies and moths. Butterfly families: *Papilionidae*, *Pieridae*, *Argynniidae*, *Libytheidae*, *Danaidae*, *Satyridae*, *Lycaenidae*, *Hesperiidae*. Moth families: *Agonoxenidae*, *Alucitidae*, *Arctiidae*, *Autostichidae*, *Blastobasidae*, *Brachodidae*, *Brahmaeidae*, *Bucculatricidae*, *Carposinidae*, *Choreutidae*, *Cimeliidae*, *Coleophoridae*, *Cosmopterigidae*, *Cossidae*, *Ctenuchidae*, *Douglasiidae*, *Drepanidae*, *Elachistidae*, *Epermeniidae*, *Ethmiidae*, *Gelechiidae*, *Geometridae*, *Glyphipterygidae*, *Gracillariidae*, *Lasiocampidae*, *Lecithoceridae*, *Lemoniidae*, *Limacodidae*, *Lymantriidae*, *Lyonetidae*, *Momphidae*, *Nepticulidae*, *Noctuidae*, *Notodontidae*, *Oecophoridae*, *Psychidae*, *Pterophoridae*, *Pyalidae*, *Saturniidae*, *Scythridae*, *Sesiidae*, *Sphingidae*, *Stathmopodidae*, *Thaumetopoeidae*, *Thyatiridae*, *Tineidae*, *Tortricidae*, *Yponomeutidae*, and *Zygaenidae*.

In the third part, a list of the 1240 subspecies known in Iran is given in alphabetical order. Synonyms, original references and the range of the subspecies (in codes) are also cited.

At the end of the work, an annotated bibliography of the 1534 Lepidopteran publications of Iran is given alphabetically.

Additionally, faunistic lists of several classical provinces of Iran are also given in the final chapters. These provinces and their species numbers are as follows; Eastern Azerbaijan Province (234), Western Azerbaijan Province (468), Fars Province (1164), Kerman Province (244), Khorasan Province (554), Kurdistan Province (255), Mazandaran Province (645), Sistan-Beluchistan Province (596), Tehran Province (925), and Zanjan Province (136).

Universal code list used in the Cesa publications is mentioned as appendix.

Nomenclaturally and taxonomically, we follow the important changes as much as possible, after their stabilization in the literature. However, it should be noted that we have to take into account own initiatives and decisions on these subjects, by reckoning with the possibilities and impossibilities of our database program currently used.

In our classification and the nomenclature that we follow, we use *Argynnidae* instead of *Nymphalidae*. Some readers are wondering what is the reference to *Argynnidae*. First author discussed the Swainson's family group names.⁷ Until now, no article in response has been published, which proves otherwise.

Compiling bibliographical information is unfortunately our own task. Under this condition, it is possible that some papers may be overlooked inevitably, or cannot be obtained due to their inaccessibilities. Whereas, our publications are free and accessible. Although such, we inform regularly our 394 readers or institutions about our new issues, with pleasure. Unfortunately, the colleagues, exhibiting the same friendly behaviour against us, are less than ten.

Producing such an enormous study is normally expected as not a one man job. As no such an intention appears on the horizon, and such a catalog work is great need for today, we attempted to publish our faunistical results on especially Asiatic countries. Of course, the present specific number of the Lepidoptera of Iran submitted is still less than to be expected. We believe that potentially more than 7000 species live in the natural areas of Iran. Similarly, the selected 1534 publications are much less for Iranian Lepidoptera. Unlimited number of the papers and books will be published in future.

In spite of some minor errors or possible informational lack, our expectation is nonetheless that this study may be helpful to the research programs of particularly native lepidopterists in Iran. For that reason, we would like to share our current personal knowledge and efforts on the Iranian Lepidoptera, by preparing this unpretentious publication.

Part 2**Annotated List of the 3925 species of the Lepidoptera of Iran**

In this part lepidopteran species recorded in Iran are listed alphabetically under their families. Butterfly and moth are separated due to the practical reasons. Valid names of each taxa, author names, date of publications, synonymous names are given. Original reference, if available, are mentioned in blue colour. Information on the range are cited as codes (bold & grey colour). Code of Iran is in red, easily noticeable. Under each family title, brief bibliographical information are given. If a publication appears in a journal, name(s) of author(s), date of publication, abbreviation of the journal, volume and pages are mentioned; otherwise, authors and dates are given only.

In the synonyms, # denotes nomenclaturally unavailable name.

Butterflies

In this part totally 420 species are listed alphabetically.

CODE LIST of the WORLD for the CURRENT CESA PROJECTS

Stand 30.07. 2014

by

Ahmet Ö. Koçak

Totally 6570 codes of the collecting localities in various provinces, regions and states in the World are listed below. The localities are given alphabetically under the states. For example, Andarab, Andkhui, Anjuman etc are listed under the Afghanistan state, coded as "AF".

Adr Andarab (AF)
Anh Andkhui (AF)
Anj Anjuman (Bd Bqu AF)
Arh Arghandab (AF)
Asm Asmar (AF)
Bd Badakhshan (AF)
Bmu Bala Murghab (Hr AF)

Some localities are mentioned with their geographical coordinates.
